Tastatur- und Maus-Set Logitech MK270

The reliable wireless set

The reliable Logitech® Wireless Combo MK270 wireless keyboard and mouse set connects via the tiny Logitech Unifying® nano-receiver. Logitech Advanced 2.4 GHz wireless technology provides a reliable connection with a range of up to 10 meters. Even in environments with heavy WLAN traffic, delays or outages are extremely rare. The Logitech® Unifying receiver is so tiny it can be plugged into your notebook at all times, even when you're on the move. The mouse also has an integrated storage compartment for the Unifying receiver, so you can take the mouse wherever you use your computer.
